FPS SOLO ELECTRONIC LOCKING SYSTEMS
FPS Electronic Locking Systems

Electronic locks for display cases, lockers and sliding doors

This small intelligent electronic cabinet lock has a wide range of uses. Based on a proxy system, up to 50 keys (e-cards or chips) can be activated for each lock. This flexible system is ideal for:

- Hospitals (each patient has their own key)
- Shops (cabinets, display-cases)
- Household (private areas, child safety)
- Gyms, schools
FPS Electronic Locking Systems

Functions:
- Reliable function through up to 25 mm of non-conductive material
- Minimum of 25,000 latch openings per battery
- 50 different keys can be programmed per lock
- Simple to install
- Card based programming, No PC or electronics required

FPS SOLO – the invisible furniture lock

The new generation of „SOLO“ electronic furniture locks proves that furniture locks can be both invisible and simple to operate, too!

The SOLO lock is attached to the inside or rear of a cabinet, for example and the RFID chip opens the lock through up to 25mm of wood or glass. With up to 25,000 cycles per battery, the furniture lock can be opened more than nine times a day for over 10 years.

Based on the internal chip system, you can program the lock very easily without a pc or software, just by using a programming card. Based on a proxy system up to 50 keys (e-cards or chips) can be activated for each lock.

FPS SOLO Furniture lock - features:

- Reliable function through up to 25 mm of non-conductive material
- Minimum of 25,000 latch openings per battery
- 50 different keys can be programmed per lock
- Easy installation

FPS SOLO SET 1

This set is suitable for fast and easy locking of furniture drawers, chest and cabinet doors. The user card will operate successfully through up to 25mm (.98 in.) wood thickness.

This set includes:

- SOLO lock
- Battery
- Two identical user cards
- FPS 31603A 3D Latch

Complete this set with a programming card which enables you to choose which key has access to which lock.
**FPS SOLO SET 2 (Sliding)**

This set makes it easy to lock and unlock all kind of sliding doors. Also it’s suitable for display cases on which the lock itself is mounted on the frame. The user card will operate successfully through up to 25mm (.98 in.) wood thickness.

**This set includes:**
- SOLO lock
- Battery
- Two identical user cards
- FPS 31603 Front Facing Latch

Complete this set with a programming card which enables you to choose which key has access to which lock.

---

**FPS SOLO SET 3 (Gym)**

Free address - Lock remains open until locked by user. After opening, the code is erased and another user can lock the locker. This free address function is perfect for indoor swimming pools, gyms, lockers, etc.. The user card will operate successfully through up to 25mm (.98 in.) wood thickness.

**Advantages:**
- Stand alone solution – no wiring necessary
- Can be installed on existing cabinets
- More than 30,000 cycles per battery
- Low battery alarm and lock remains open when battery is weak
- No PC and no software required
- Invisible from the outside, works through 20mm (0.79 in.) wood thickness.

**This set includes:**
- SOLO lock
- Battery
- One key-wristband
- FPS 31603A 3D Latch

Packing Unit: **1 set**

Complete this set with a programming card to override lock function.

**Procedure / Function / Features**

1. Choose a vacant locker
2. Close the door and lock using the RFID wristband or key card
3. The locker is now locked and can only be opened again using the same wristband or key card.
4. Hold the wristband / key card onto the lock again
5. The locker door will open automatically
6. The programming card can open occupied lockers. When the programming card is used, previously used wristbands or key cards will no longer have access.
7. More than one locker can be occupied using one key.
FPS SOLO SET 4 (Alarm)

Also available with integrated timed alarm function for added security. After 25 seconds an alarm will sound if lock is still open.

Suitable for:
- Store display cases
- Store drawers
- Medicine cabinets
- Office furniture with confidential documents

This set includes:
- SOLO lock
- Battery
- Two identical user cards
- FPS 31603A 3D Latch
- Integrated alarm

Complete this set with a programming card which enables you to choose which key has access to which lock.

SOLO Installation Options

The SOLO lock can be installed in any furniture door or drawer. Available for drawers and doors as SOLO pusher latch, or sliding with the SOLO Front locking device.
ONE is an electronic sliding door lock based on RFID technology.

The adjustable bracket works with sliding glass doors as well as with wooden sliding doors between 16 mm and 19 mm (.63-.75 in.) thick. An optional bracket is available for 3-10 mm (.12-.39 in.) thick doors.

This set includes:
- ONE RF lock
- Adjustable bracket for 16-19 mm thick panel (option for 3-10 mm thickness)
- Battery
- 2 Key fobs

Purchase separate Programming card for adding additional functions and users

Suitable for:
- Store display cases with sliding doors
- Medicine cabinets with sliding doors
- Office furniture with sliding doors

Complete this set with a programming card which enables you to choose which key has access to which lock.

Sliding doors locked with the ONE RF lock.

The ONE lock is unlocked and removed by hand.

Open cabinet

Important build-in dimensions are shown below:
TWO is an electronic sliding door lock based on RFID technology and designed for use with two sliding doors. With the Two sliding door lock, you lock two doors with one lock.

The lock is installed inside and on the front of glass doors; the lock is invisible from outside. The lock locks automatically after 3 seconds. As soon as you close the door the doors are locked.

This set includes:
- ONE RF lock
- Glass Installation Kit, or screws depending on version purchased
- Battery
- 2 Key fobs
- Purchase separate Programming card for adding additional functions and users

Suitable for:
- Glass sliding doors
- Wooden sliding doors
- Maximum 2 doors

Technology:
- RFID fob or RFID cards
- Range up to 30 mm
- 125 kHz or 13.56 mHz
- EM4200, EM 4450, Hitag or Mifare chips are supported
- Access control feature with a programming card

Features:
- Battery driven (with battery low alarm)
- Up to 30.000 cycles per battery
- Programmable without any pc or software
- EM4200, EM 4450, Hitag or Mifare chips are supported
- Simple to install

Standard version:
For glass sliding doors: 10, or 13 mm total distance. These sets also include a glass installation kit. For wooden doors: 15, 17, 21 or 24 mm total distance. These sets include screws.

You will find also a small support-plate for the final adjustment. Special lengths on request.
**FPS 31603 3D Spring Latch**

Equipped with a mounting bracket and a spring this latch allows easy installation thanks to the oblong screw holes. The mounting tolerances are within 6 mm (.24 in.) and the spring is used as a pusher for a door. The wood mounting flange contains an extra hole to lock in the final position.

**FPS 31602 200kg Pusher Latch**

With a V2A stainless steel part, this locking device has a breaking point of approximately 200 kg (440.93 lbs.) The material is ZAMAK, a robust zinc aluminum alloy. The integrated pusher will automatically open light drawers and cabinet doors. The distance between the screw holes is identical to the lock, i.e. 48 mm. The slots allow for easy adjustment of the locking device.

Glass & Metal Kits

FPS 31810 Glass Kit for Solo
This set consists of a plate for the lock, black foil and screws. The double-sided adhesive tape will hold up to 25 kg or 45 kg (55lbs. or 99lbs.), depending on the direction of pull.

Item  Order No.
FPS 31810 Glass Kit for Solo 0031810
Packing Unit: 1 set

FPS 31811 Glass Kit for Latches
This set consists of a plate, black foil and 2 sets of corresponding screws for the locking devices FPS 31601, FPS 31602 and FPS 31603.

Item  Order No.
FPS 31811 Glass Kit for Latches 0031811
Packing Unit: 1 set

How to use the assembly kits:
spray water onto the area where the lock and locking device will be installed. Remove the protective backing from the black foil and place the foil in the correct position. Use a credit card or key card as a squeegee to remove the water from underneath the foil by sweeping the card firmly from the center to the sides. This will enable bubble-free installation.

Metal Kit for SOLO & SOLO 13
By making a cutout on metal doors, the Solo’s internal antenna will receive the open/close signal.

With the standard kit, a plain black cover film is provided. This film can be customized with a logo.

To install make cut out for mounting using the cut out template, install the lock and the front plate. Apply the foil film.

Programming instructions

Activating the programming card
1. Press the push-button on the rear side 1
2. The lock will make a ticking sound (signal).
   Hold the programming card on the lock within 3 seconds of
   hearing this signal.
3. Two short ascending tones will confirm that the programming card has been saved successfully.

Initializing a key
1. Please place the programming card onto the lock.
2. The lock will make a ticking sound (signal).
   Place the key card or chip key onto the lock within 3 seconds of
   hearing this signal.
3. Two short ascending tones will confirm that initialization was successful.
4. The lock can now be opened using the key card or the chip key.
   Tip: The maximum for keys per lock is 50.

Deleting the key card or chip key
1. Please place the programming card onto the lock.
2. The lock will make a ticking sound (signal).
   Place the key card or chip key onto the lock within 3 seconds of
   hearing this signal.
3. Two short ascending tones will confirm that deletion was successful.

Delete all keys
To delete all keys at once, place the programming card onto the lock for several seconds. Deleting all user keys does not affect any programming functions added to the lock.
**FPS PK Programming Card**

This programming card can be used to grant or deny access as well as to change the software settings. Only one programming card is necessary to operate multiple locks. In a shopping mall for example one programming card can operate 1,000 locks. The programming card can be assigned to a lock by pressing the button on the rear side and then holding the programming card on the lock within 3 seconds.

**FPS 10-Combination Lock**

**10Ten-Combination Lock**

The electronic combination lock 10Ten is suitable for a variety of applications such as:
- Fitness centers
- Clubs
- Department stores (safes)

The keypad is fastened directly to the lock underneath. The 7cm long cable enables easy installation. The built-in lithium battery guarantees a maximum life-span of 10 years. It can be expected to last 5 years with everyday use. The battery is checked during the opening process and when the battery is running low the lock will remain open, an alarm will go off and the lock cannot be used again until the battery has been replaced.

**Emergency opening for the public lock**

There is a master code mentioned in the manual.

A caretaker, for example, can open a locker using this code. An emergency opening will cause the previously entered code to be deleted.

**The package includes:**

- the keypad 58 x 58 x 4 mm (2.28 x 2.28 x .16 in.)
- locking device
- Lock assembly with Standard Pusher Latch
- Battery with a maximum life-span of 10 years

---

**FPS TEN O (Public)**

This version is for use in public institutions. The lock is open in idle mode. The user puts his/her clothes in an open compartment/locker and locks it by entering his/her individual code.

The lock is now locked and can only be opened using the previously entered code. As soon as the lock has been opened, the code is deleted and the compartment/locker can be re-used.

There is a master code mentioned in the manual.

A caretaker, for example, can open a locker using this code. An emergency opening will cause the previously entered code to be deleted.

---

**FPS TEN P (Private)**

After installing the battery a personal code can be entered. The LED lights up briefly and the code is entered once again and then confirmed.

The lock is locked in idle mode. After entering the correct code the lock opens for 3 seconds and then closes again automatically.

F cris BESLE 00:
In combination with our furniture and door locks, you can use this beetle‐0V version as a sub-unit lock. This beetle‐0V has a 75cm (29.53 in.) cable which can be plugged directly into the lock. Either the Solo, keypad, or Duo locks can control this unit.

- 0.75m (29.53 in.) cable
